

EXPLORING TO REALIZE POTENTIAL OF A MULTI-MILLION OUNCE GOLD DISTRICT IN SOUTHERN BRAZIL

LAVRAS GOLD

TSX-V LGC

Lavras Gold is a spin out from Amarillo Gold Corporation, which was bought by Hochschild Mining in early 2022

Building from a base of 1,000,000 ounces of gold

Well-funded to meet short-term goals

Tight capital structure after 10:1 share consolidation

Pipeline of 23 known gold targets over 22,000 hectares near excellent infrastructure

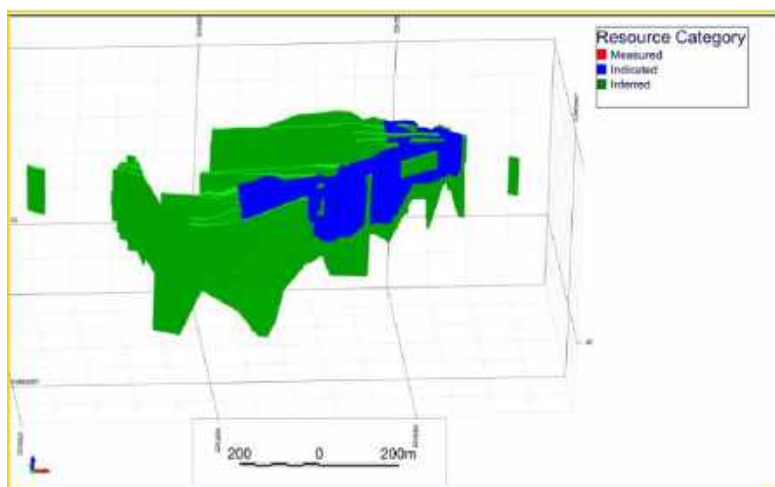

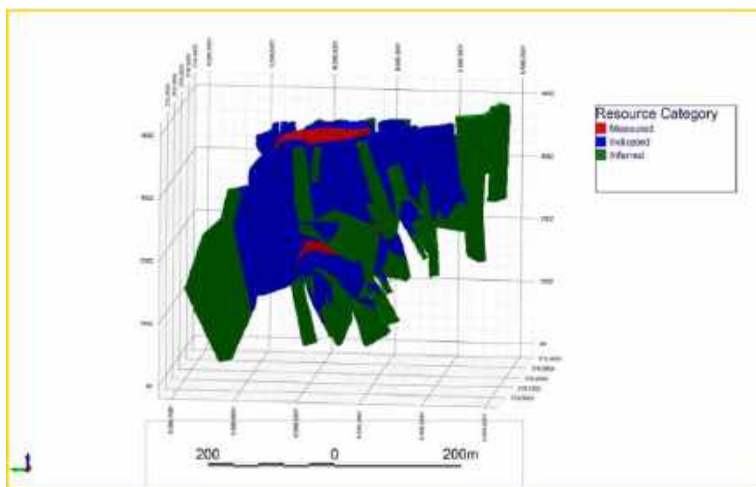

Led by a team that unites exploration experience with capital markets acumen

NI 43-101 MINERAL RESOURCE ESTIMATES

BUTIÁ 500,000 ounces of gold

CERRITO 500,000 ounces of gold

- Exploration to date suggests that the **LDS Project** is primarily **an intrusive hosted gold system** likely of alkaline affinity with epithermal and porphyry characteristics
- **Alkaline gold copper systems** can be **large and high grade**
- **Scale of known gold showings** at LDS is on par with other **large-scale alkaline gold systems**
- **Intrusive complex** is **10 kilometres in diameter**
- **12,000-metre diamond drill program** underway
